

OPINION

on a dissertation work for obtaining a scientific degree "PhD" on: area of higher education 3.0. "Social, economic and legal sciences", professional direction 3.8. "Economy", scientific specialty - "Production organization and management"

Author of the dissertation: ABETARE SHUKERI KABASHI

Dissertation topic: "MANAGEMENT OF FINANCIAL STABILITY IN THE AGRARIAN SECTOR OF THE REPUBLIC OF KOSOVO"

Prepared the opinion by: Associate Professor Petar Borisov Borisov, DcS, 3.0. "Social, economic and legal sciences", appointed as a member of the scientific jury by order No. RD-16-983 of 07.10.2022 by the Rector of AUP.

1. Relevance of the problem.

Financial stability management is a complex process, the complexity of which is determined by the complex influence of multiple factors in the business organization and its surrounding environment. Despite the numerous studies in the field of the topic chosen by the doctoral student for the dissertation research, the action in terms of significance and direction of impact of all factors determining financial stability has not yet been revealed. Therefore, I believe that to date, the dissertation research is relevant and of interest to the scientific community. As a representative of this community, I believe that financial stability is a process that depends on achieving a balance between the interests of the owners of capital, the managers who manage this capital and the workers who work in the production created by this same capital. In the business organization, the interests of the various departments (specialists) who act from the position of the expertise they have accumulated in their work are opposed. Very often conflicts arise between financial and marketing specialists regarding the financial framework of the future development of new products. Therefore, I believe that the doctoral student has rightly allocated a significant part in his dissertation work on the achievement of financial stability, through the passage of instability in the phase developed of the organization such as culture, structure and interaction between its individual departments, units and teams. on the financial framework of the future development of new products. Therefore, I believe that the doctoral student has rightly allocated a significant part in his dissertation work on the achievement of financial stability, through the passage of instability in the phase developed of the organization such as culture, structure and interaction between its individual departments, units and teams. on the financial framework of the future development of new products. Therefore, I believe that the doctoral student has rightly allocated a significant part in

his dissertation work on the achievement of financial stability, through the passage of instability in the phase developed of the organization such as culture, structure and interaction between its individual departments, units and teams.

2. Purpose, tasks, hypotheses and research methods.

The goal of the dissertation is to analyze and evaluate the financial stability of the agrarian sector of the Republic of Kosovo, as well as to propose recommendations for the effective management of the financial stability of agrarian enterprises.

To achieve the intended goal of the dissertation research, the following research tasks are set for resolution:

- Theoretical analysis and identification of the main factors determining financial stability in an economic system;
- Analysis of the decision-making process in managing financial stability at the macro and micro level in an economic system;
- Analysis of the development and management of the financial system in the agrarian sector of the Republic of Kosovo;
- Analysis of the financial stability of agricultural enterprises in the Republic of Kosovo and synthesis of conclusions and recommendations for improving management practices in this area.

It is a credit to the doctoral student and his supervisor that they have correctly defined the subject and the object of research and that they logically correspond to the chosen topic of the dissertation work.

Subject of research are the processes of managing the financial stability of agrarian enterprises in the Republic of Kosovo.

Object of research is the financial system in the agrarian sector of the Republic of Kosovo.

3. Transparency and presentation of the obtained results.

The dissertation is set out in an introduction, five sections and a conclusion spread over 141 pages, as well as a list of the literature used. The study is illustrated with 11 tables and 12 diagrams. 193 literary sources were used in the dissertation work.

4. Discussion of the results and used literature.

In the dissertation structured in this way, the topicality of the chosen topic is skillfully presented and argued. The main elements of the research are presented in an orderly logical framework already in the introduction. This approach enables the reader (reviewer) to quickly and easily gain an idea of the purpose, object, subject and tasks of the scientific research even before entering in depth into the research carried out by the doctoral student and his scientific supervisor. The doctoral student has also determined the limits of penetration in the study of the defined scientific problem, objectively arguing the main limitations in the process of his work. Every single scientific research is carried out within the framework of limitations - organizational, financial or normative. However,

In conclusion, I must note that the dissertation meets the requirements, in section II, art. 4 of the Law on Scientific Degrees and Titles. I believe that it contains original

results on the basis of which specific contributions can be defined in a scientific and scientific-applied aspect.

5. Contributions of the dissertation work

The following scientific and applied contributions can be highlighted in the dissertation:

- The essence of financial stability as a key factor for the economic development of the economy and the agrarian sector has been clarified;
- The main defects and anomalies of the market economy have been identified, which have an impact on the process of making managerial decisions in the management of the financial stability of economic systems;
- A comparative analysis of the financial systems of the countries of the Western region was carried out in Balkans and their influence on the development of the economy and in particular the agrarian sector has been studied;
- An analysis and assessment of the management of the financial stability of the agrarian sector of the Republic of Kosovo was carried out;
- Specific conclusions and recommendations have been formulated to improve the management of financial stability in the agrarian sector of the Republic of Kosovo.

6. Critical Notes and Questions.

I have no specific critical comments regarding the dissertation submitted for opinion.

7. Published articles and citations.

The PhD student has published a total of six co-authored articles:

1. Shyqeri Kabashi, Fatos Sadiku, Abetare Kabashi. Development of small businesses in Kosovo. 2018. INTERNATIONAL JOURNAL – KNOWLEDGE. Vol. 23 No. 4, pp. 1127-1131.
2. Nexhmije Kabashi, Abetare Kabashi. Ethics in research works. INTERNATIONAL JOURNAL – KNOWLEDGE. Vol. 43. No. 6, pp. 1309-1313.
3. Ramadan Beqiri, Abetare Kabashi. Impact of covid-19 on education, challenges related to distance learning (ON-LINE) and advancement in the quality of education. INTERNATIONAL JOURNAL – KNOWLEDGE. Vol. 43, No. 2, pp. 378-387.
4. Nexhmije Kabashi, Primer Kabashi, Abetare Kabashi. Safety of food products. 2020. INTERNATIONAL JOURNAL – KNOWLEDGE. Vol. 36. No. 1, pp. 155-159.
5. Abetare Kabashi. Gross domestic product performance in Kosovo after liberation. Journal Biznesi-Scientific journal on issues Economic, Law, Emergency and security. Vol. 19-20. p. 11-33.

6. Abetare Kabashi. The indication of small businesses in the development of the economy of Kosovo. Journal Biznesi-Scientific journal on issues Economic, Law, Emergency and security. Vol. 21-22. pp. 33-51.

From the presented publications, it is clear that the doctoral student meets the minimum scientometric requirements for acquiring the ONS "doctor" in professional direction 3.8. "Economy".

CONCLUSION:

Based on the various research methods learned and applied by the candidate, the correctly performed experiments, the generalizations and conclusions made, I consider that the submitted dissertation meets the requirements of the ŽARSRB and the Regulations of the Agrarian University for its application, which gives me grounds to evaluate it POSITIVE.

I take the liberty of proposing to the honorable Scientific Jury also to vote positive/negative and to award ABETARE SHUKERI KABASHI a scientific and educational degree "doctor" in the scientific specialty "Organization and management of production".
